

Captain::Node::MesoUnit
::MoveLaneChangeVehicles

UtilTest::VehicleQueueInsert
Extract

Captain::Util::VehicleQueue
::Extract

```
graph LR; A["Captain::Node::MesoUnit::MoveLaneChangeVehicles"] --> C["Captain::Util::VehicleQueue::Extract"]; B["UtilTest::VehicleQueueInsert<br/>Extract"] --> C;
```

The diagram illustrates a directed relationship between two source nodes on the left and a target node on the right. The top source node, labeled 'Captain::Node::MesoUnit::MoveLaneChangeVehicles', has a blue arrow pointing to the target node. The bottom source node, labeled 'UtilTest::VehicleQueueInsert' and 'Extract', also has a blue arrow pointing to the same target node. The target node is labeled 'Captain::Util::VehicleQueue' and '::Extract'.
