

TiXmlElement::Parse

TiXmlDeclaration::Parse

TiXmlAttribute::Parse

```
graph LR; A[TiXmlElement::Parse] --> C[TiXmlAttribute::Parse]; B[TiXmlDeclaration::Parse] --> C;
```

The diagram illustrates a relationship between three XML parsing functions. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'TiXmlElement::Parse' and the bottom box contains 'TiXmlDeclaration::Parse'. On the right, there is a gray rectangular box with a slightly wavy bottom edge containing the text 'TiXmlAttribute::Parse'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box. The top arrow starts from the right side of the 'TiXmlElement::Parse' box, and the bottom arrow starts from the right side of the 'TiXmlDeclaration::Parse' box.
