

Captain::Node::SinkUnit
::GetLeadingVehiclePtr

```
graph LR; A[Captain::Node::SinkUnit::GetLeadingVehiclePtr] --> B[Captain::Util::VehicleQueue::Peek]; A --> C[Captain::Util::VehicleQueue::Size];
```

The diagram illustrates a function call from the `Captain::Node::SinkUnit::GetLeadingVehiclePtr` method to two methods of the `Captain::Util::VehicleQueue` class: `Peek` and `Size`. The source method is highlighted in a grey box, while the target methods are in white boxes. Blue arrows indicate the direction of the calls.

Captain::Util::VehicleQueue
::Peek
