

TiXmlElement::Attribute

TiXmlElement::QueryIntAttribute

TiXmlAttribute::QueryInt  
Value

```
graph LR; A[TiXmlElement::Attribute] --> C[TiXmlAttribute::QueryInt Value]; B[TiXmlElement::QueryIntAttribute] --> C;
```

The diagram illustrates a relationship between two methods of the `TiXmlElement` class and a method of the `TiXmlAttribute` class. Two light gray boxes on the left, labeled `TiXmlElement::Attribute` and `TiXmlElement::QueryIntAttribute`, have blue arrows pointing to a darker gray box on the right labeled `TiXmlAttribute::QueryInt Value`. This suggests that both `Attribute` and `QueryIntAttribute` methods in `TiXmlElement` delegate the `QueryInt` operation to the `QueryInt` method of the `TiXmlAttribute` object.
